

THE **REBEL** LEADER'S

Comparison Chart

Traditional Leadership

Versus **Rebel** Leadership

Traditional Leadership is not working. There is a lack of leadership in our countries, companies, and organizations. That is a problem and it must be fixed.

Leaders who believe they know best and want power over others are focused on winning. That creates silos and breeds mistrust while destroying collaboration, creativity and innovation. Lasting success comes from a mindset and leadership style opposite of this dominating approach.
